IRONHIDE™ Heavy-duty Steel-stitched Split-leather Glove

New, from Superior: the IronHide™ line of heavy-duty steel-stitched gloves, featuring levels of cut and abrasion resistance that are literally off the charts, at a price you won't believe. In fact, comparable hand protection in the past doesn't hold a candle to these gloves when it comes to both price and performance. The Ironhide™ is set to launch a mini-revolution in the hazard-resistant glove category with powerful protection in a surprisingly dexterous glove.

Designed for the heaviest, most demanding applications—handling rough castings, blocks, bricks, heavy stampings, steel cables—500 strategically placed heavy-gauge steel staples cover the entire double split-leather portion on the palm side (including the thumb crotch). This rugged durability makes for an incredibly long-lasting glove, since the staples protect in what is the most critical wear area of any glove. The split-leather glove body is out-seam sewn, with seams moved away from inside the fingers, toward the back, for excellent comfort and longer seam life. All seams are double stitched.
