MXVSB

Clutch Gear[®] Anti-impact Mechanic's Glove

This new addition to our Clutch Gear[®] line features anti-impact, dense, thermo-plastic foam rubber patches at the back of the hand to protect only in the places where impact occurs, so glove stays fully flexible. PVC SureGrip palm patches offer durable, cushioned grip in just the right places. A Kevlar[®] thumb patch extends the life of the glove in the highest wear area.

Two styles to choose from: a summer version with Velcro at the wrists to provide a snug, custom fit.; and a winter version with 40 gram fleece-lining and 2-inch Neoprene cuffs. The winter version also features special waterproof Enprotex[®] lining for stay-dry comfort.

Great styling and comfort.
